

# Lendistry & Banyan Infrastructure

## Clean Energy & Climate Finance Platform

### One Partnership, One Vision

Banyan Infrastructure and Lendistry have partnered to create a technology and services solution to manage and mobilize clean energy and climate funds at scale. This solution is designed to drive climate-critical capital toward environmentally vulnerable communities and transform the market.

Our Solution offers a comprehensive technology and services package built on best practices in sustainable infrastructure financing and cutting-edge financial technology, supporting both the swift deployment of funds and the establishment of standardized processes.

### Why Us, Why Now

Banyan Infrastructure and Lendistry, a certified CDFI, have spent over 15 years building systems, processes, technology, experience, and data-driven insights, culminating in a single solution designed to address the significant economic and environmental challenges of our time. This partnership was born out of a recognition that, together, our organizations can support the objectives of GGFR awardees and the entire sustainable infrastructure ecosystem with an unprecedented, holistic approach.

**Accessible origination platform that fosters transparency and collaboration between the borrower and the lender.**

**Seamless portfolio and compliance management proactively manages risk and automates impact and performance reporting.**

**Cohesive technology, services, and in-built network to establish the operational foundation for increased private market participation.**

## Climate Impact, Purpose-Built Solution

The cutting edge, AI enabled platform technology is designed to integrate with existing project pipelines, ensure compliance, monitor and report metrics, and support portfolio management. The Tech-enabled services can manage loans and investments end-to-end - from underwriting, closing, funding to servicing. Key features include multi-disbursements, virtual wallet capabilities, call center, port management and solutions to mobilize capital markets

Banyan Infrastructure and Lendistry collectively bring together their existing ecosystems of mission-driven partners nationwide, including small businesses, intermediaries, and partners that have authentic experience working with, for, and in Low-Income Disadvantaged Communities (LIDAC), as well as existing capital markets partners, eager to engage in creating GGRF secondary markets.

## One Integrated System, One Mission

The Banyan Infrastructure and Lendistry Project Team offer decades of experience in program design and management, project finance, software development, green/impact lending, securitizations, and capital markets.

We integrated the best of both offerings, covering all project lifecycle phases. This includes achieving GHG reductions, advancing environmental justice, engaging communities, fulfilling EPA reporting obligations, and developing standardized processes to drive scale and develop secondary markets for clean energy assets.
